

# Covid Twitter Bot

Saurabh Kumar Sharma

Durlav Kumar Patel

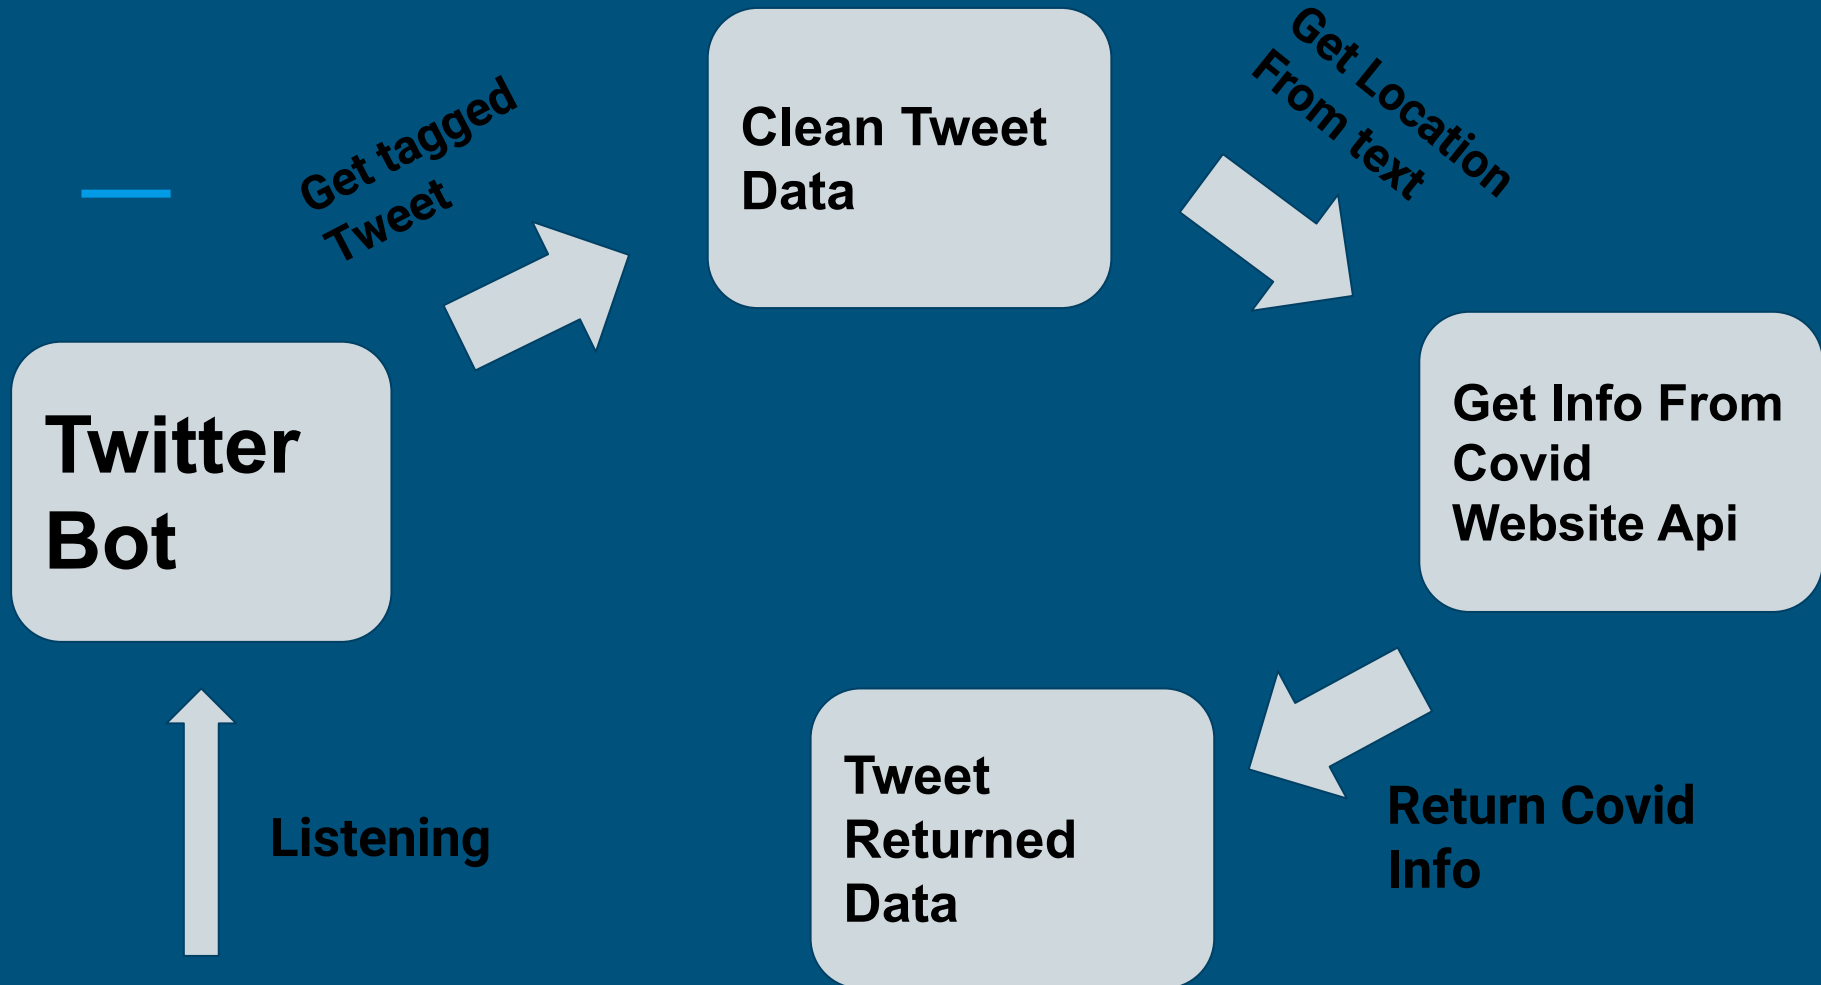

# Problem Statement

---

- The objective of this project is to scrape tweets using twitter's api and reply to them automatically about corona status of the mention location of the tweet by scraping covid data from a website.
- Our twitter bot will also tweet corona status of the country regularly everyday automatically.

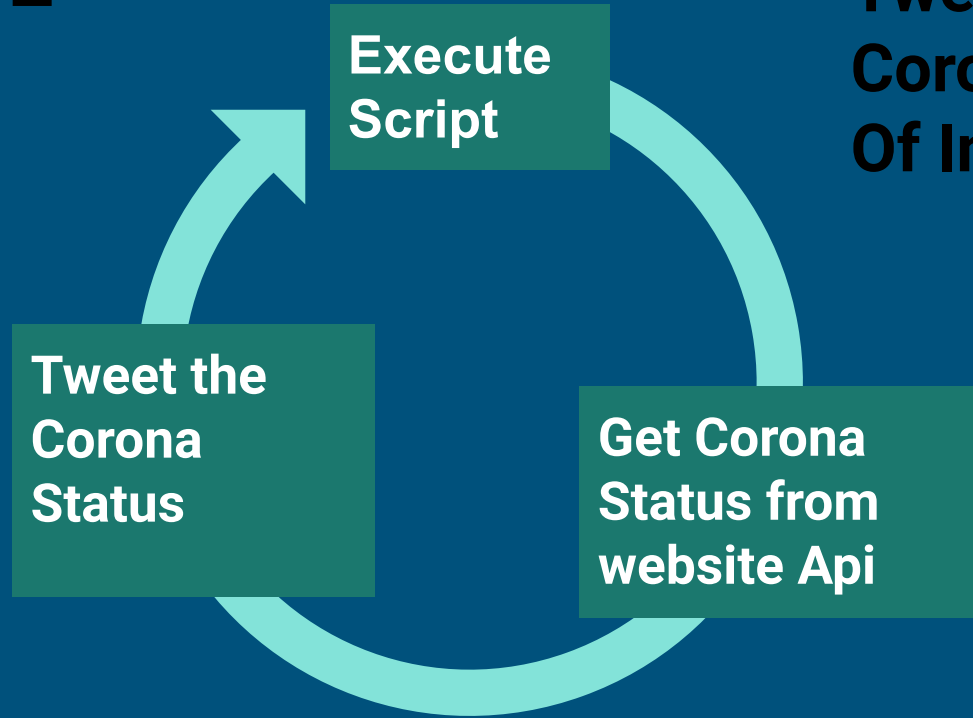

# Design Approach

## Approach 2

---

**Tweeting Daily  
Corona Status  
Of India**

# Result

---

- The twitter bot works perfectly by listening to tagged tweets and replying them with the desired information .
- Second part of our twitter bot is also working smoothly by tweeting daily corona updates.

# Conclusion & Future Scope

---

As of now we've implemented tweets based on just states of india but we further plan to broaden the horizon of search by adding data from all the districts of india as well .
